RESEARCH IN PROGRESS

Anterior coverage of normal hips in children and adolescents with open triradiate cartilage using the false-profile radiograph. Co-investigators – D.A. Podeszwa & D.J. Sucato.

The predictive value of intraoperative spine radiographs following posterior spinal fusion and instrumentation for adolescent idiopathic scoliosis. Co-investigators – D.J. Sucato & A. McClung.

Retrospective review of infantile idiopathic scoliosis: Natural history and treatment outcomes. Co-investigators – D.J. Sucato & A. McClung.
The diagnostic evaluation of presumed infantile idiopathic scoliosis. Co-investigator – L.A. Karol.

OTHER RESEARCH EXPERIENCE/EMPLOYMENT

1993 Summer Research Internship
Cornell College, Departments of Biology and Chemistry

- Analyzed the role of malate dehydrogenase in plant cell defense response.

1994-1995 Research Assistant
United States Department of Agriculture
Roman L. Hruska Research Center, Clay Center, Nebraska

- Studied the enzymatic breakdown of livestock meat during the aging process.

1995 Summer Research Internship
University of Nebraska Medical Center, Department of Family Practice

- Assessed factors influencing treatment decisions in low-income women with early-stage breast cancer.
